BARTEC ET60/65 Ex2

A Rugged, High-Performance 10" Android Tablet for Hazardous Areas

The Bartec ET60/65 Ex2 delivers powerful mobile computing for Zone 2 environments in a slim, rugged design.

Built on a 10.1" high-brightness display with 5G and Wi-Fi 6 connectivity, it supports demanding inspection, maintenance and asset management applications.

Hot-swappable battery options, MIL-STD-810H durability and optional integrated barcode scanning on the ET65 variant make it ideal for industrial field use.

Optimised for Hazardous environments

Unmatched power and Performance

Simple and intuitive online procurement of industrial instruments & controls

UK Stock / Rapid Despatch

Able holds a wide range of ATEX mobile devices and accessories in UK stock for immediate delivery. Fast despatch ensures critical equipment reaches your site on time, supporting shutdowns, maintenance windows and urgent operational requirements.

Call-Off Agreements for Projects

Able provides call-off agreements for customers with ongoing or phased project needs. Pre-agreed quantities are reserved and released on schedule, ensuring continuity of supply and removing delays for long-term programmes and multi-site deployments.

Device Configuration / Pre-Loading

Devices can be supplied fully configured with customer-approved applications, settings and industry software. This ensures units are ready for use straight out of the box and reduces the time required on-site for commissioning, setup and deployment.

Experienced UK Technical Support

Years of engineering expertise allow our technical team to quickly understand your application requirements and recommend fit-for-purpose hazardous area equipment. Able provides guidance, setup assistance and lifecycle support for every device supplied.

Independent Multi-Brand Advice

Able represents leading hazardous area manufacturers including Bartec, Ecom, Aegex, Atexxo, Armadex and Xshielder. If you require alternative options or specialist devices, our team will source and recommend the most suitable equipment for your site.

Coordinated Project Supply

Need to align deliveries with engineering teams or site access windows? Able coordinates device supply for project timelines, ensuring all recipients receive the required documentation and delivery information to support smooth procurement workflows.

Why purchase with us?

Providing a hassle free, secure, fast and reliable service.

Hassle Free

Able is the one-stop supplier for hazardous area mobile devices, offering certified products from leading manufacturers in a clear and easy-to-navigate format.

Secure Checkout

Once the correct device is selected with support from our team, customers can order with confidence, using secure payment or existing credit arrangements.

Reliable Delivery

With UK stock and trusted couriers, we provide fast, dependable delivery. Customers with an Able account can also track orders in their online customer area.

Have a particular application or project in mind?

Able supports customers across a wide range of hazardous area applications, from inspection and maintenance through to digital workflows and mobile asset management. Our specialists can assist with defining requirements, identifying suitable certified devices and ensuring the equipment aligns with your operational and safety needs.
